

## Sevique: Redefining skin

“Sevique Skin Care: Natural, Healing Anti-Aging Products that Really Work!

If you've been searching for a great line of products for blemished, damaged or aging skin, check out Sevique! Haven't heard of it? Read on.

I feel extremely privileged to have been given the opportunity to use a collection of Sevique's products. After a month of using this collection, my verdict is in ... a truly fabulous and effective lineup.

Formulated with high levels of anti-oxidants, anti-inflammatories and moisturizers, these products work hard to soothe, heal, nourish, soften and enliven skin, while reducing redness and wrinkles. Extracts of blueberry, cranberry, and gogi berries featured prominently in most products, as well as green tea extract and moisturizers like shea butter and beeswax. And the scent - so very fresh and light!

In summary, I have to say that not only am I crazy about these products (they're luxurious and incredibly effective), but I love the option of being able to purchase individual products or an entire collection.”

Healthy Life Toolkit.com

“I am always looking for the newest and best products. I began using Sevique and within the first week I saw amazing results! I continued to use the product and not only saw a huge difference in fine lines, dark spots and under eye circles but I also began to see less and less breakouts! I have gone through hundreds of products and have never had results like this! Thank you for my beautiful complexion!”

—Genna Rodriguez, Licensed Esthetician

“As a professional make-up artist I constantly get asked questions by my clients about skin care. I really have to keep up with the latest and greatest products for every type of skin or skin problem. That being said, after I read about Sevique and all the wonderful ingredients in the products that they offer, I knew I had to try it.

I've been using the line for a little over a month now and I would recommend it to anyone I know. After the first two days of using it twice a day my boyfriend said he saw a drastic difference in my skin. It was softer, smoother, and just had an improved over all radiance...

I would recommend Sevique to everyone. My grandmother, mother, as well as me and my younger sister could benefit from every product.

At 25 I may not have deep lines or wrinkles but my small lines, dry skin patches and puffiness/redness were greatly improved by these products. Give them a try and discover what this wonderful line can do for you.”

—Daniela Bernotas, Professional  
Hollywood Make-up Artist
